4	CPR-6a	Ohio Female / DISS Male Quick Connects
4	CPR-6b	Ohio Male / DISS Male Quick Connects

Optional Items for Your Consideration:

1. Use the **LSI** part # CPR-29 “combination” extension and Swivel that has a 99.99% Viral/Bacterial filter and a Heat Moisture Exchanger (HME) between the mask or ET-tube and the Oxlator EMXb. As a filtration comparison, a ‘hepa’ type filter is rated for 99.97% for Viruses and bacteria. Consideration should also be given to the capture of chemical vapors through an additional filtration media.
2. Additional Oxlator EMXbs and / or SCBA regulators with quick disconnects attached to “D” tanks or “SCBA” tanks for ventilation of persons waiting for decontamination / processing, etc.
